# True-to-life floors

The versatile collection of LVT floors from TFD have true-to-life decors. Among other things a register embossing plank finish is used. By this we mean that the relief of the plank corresponds to the print. This is called Embossed In Register (EIR), or register embossing. The floors have beautiful structures such as wood, stone, concrete and marble, in an extensive color palette. Through new innovative techniques, the grain is clearly visible and adds depth and character to the floor.

Our designers find their creative inspiration in nature and follow the important trends in the field of fashion, interior design and architecture. Through unique combinations of advanced techniques, color treatments and layering and the right choice of plank finish (matt, glossy or satin), a surprising collection of natural-looking floors has been developed.

At TFD you will find true-to-life  
LVT floors with unique designs  
for every interior, both trendy,  
industrial, modern, rustic and classic.

# TFD a thoughtful choice

A flooring directly determines the whole atmosphere of a room in a living environment, regardless of whether it is a living space or workplace. A thoughtful choice for ease of use, quality, durability and application possibilities make the floor reflect your personality. TFD has been an expert in the production of LVT floors for many years. The LVT floors from TFD are true to nature, warm and contemporary, pleasantly soft and wear-resistant hard, in wood and stone decor and yet strikingly sound damping. With a TFD floor, a space comes to life.

## Sustainable and future-oriented

We strive for sustainability, clean production, good working conditions for our employees and refuse any form of child labour. TFD floors consist solely of so-called Virgin PVC's. These are pure first quality PVC's, not polluted by lesser qualities. Our LVT floors can be 100% recycled. This is how we see the future, taking care of the environment and the well-being of our customers.

## For private and project use

The strong, wear-resistant LVT floors from TFD are very suitable for both the project market and for the private market. A wide choice of different decors and laying options offer our floors something for everyone. You can choose from bonding, click, loose lay or our magnetic system.

*TFD a thoughtful choice for a comfortable, sustainable floor!*

- Easy and cost-saving reducing maintenance
- Moisture and dirt proof
- Sound reduction
- Anti allergy
- Suitable for under-floor heating and cooling

# New in the collection

The collection of LVT floors from TFD is regularly expanded with new floors, designs and colors. The floors below are new in our range.

Like all floors in our collection, these new LVT floors are made from Virgin PVC's and are not contaminated by lesser qualities.

These new floors also can be recycled.

# Experience

Experience 2

Experience 1

Experience 3

Experience 6

Experience 7

The weathered nature of this LVT floor reflects a story. The design of these floor gives the impression that they have already had a lifetime behind them. This experience is enhanced by the image of earlier processing. The Experience comes into its own in an industrial living style that is characterized by natural and sturdy elements. Due to the neutral colors with striking accents, this floor combines well with materials such as metal, steel, leather, concrete, bricks and wood.

Experience 4

| Package content:   | 4.11 m <sup>2</sup> |

# Creative Stone

This floor is distinguished by a bold design, which ensures a creative appearance of your interior. The Creative Stone has a distinct character through the special adaptations of the "stone look". The oxidized effect and weathered concrete gives an experimental and surprising image of the space and comes fully into its own in an industrial living style. The special finish gives this LVT floor a rich appearance. Be inspired by the endless possibilities of this floor.

# Firm

This floor has a sturdy and robust appearance. It reflects the outdoors. The clear drawing and embossing of the floor has a natural character. With the Firm you bring the outdoor feeling inside. This LVT floor brings the experience of nature into your home. It fits in well with the trend to use natural shapes, large house plants and unfinished materials in interior styles. The Firm brings the interior to life.

# Rigid Core

## Just Click collection

Meet the new click floors from TFD. The strong Rigid Just Click LVT floor can be used in both the private and contract market. They combine the best of both worlds: the ease of use of LVT and the simple installation process of a click floor. Rigid Just Click is 5.5 mm thick with a wear layer of 0.55 mm.

The embossing gives the designs a true-to-life appearance. The Rigid Core collection is strong and stable.

Just as with the production of (dryback) LVT floors, we also use a recipe without phthalates as plasticizers for our Rigid collection. Instead, we have opted for alternatives that have not been found to be harmful to human health and the environment. All our floors consist of Virgin PVC's. These are pure first-class PVC's that are not contaminated by lesser qualities. Making these LVT floors 100% recyclable.

Our floors are ready for the future.

# Heritage

Rigid Just Click

The Heritage is part of the Just Click collection. The warm appearance is characteristic for this floor. The Heritage exudes a full and rich character due to the various tones. This LVT floor creates a history to your interior. As a characteristic element, the Heritage fits in well with a living style with sturdy and vintage accents where unexpected combinations predominate. This floor matches with the interior style to combine materials such as coarse fabrics, sanded leather, unfinished wood and various types of natural stone to your heart's content.

# Elements

## Rigid Just Click

The Elements is part of the Just Click collection. This LVT floor has a “natural stone” appearance. As if it is shaped and ground by the earthly elements, the Elements has a solid and soft character. The shade of earthy colors and the appearance of honest and natural material form a pure basis for your interior. By combining this floor with raw wood, linen and black steel, a balanced image is created in the room, which gives a feeling of peace and relaxation.

Size A: 115 x 610 mm

| Elements A  |                     |

| Package content:   | 2.23 m <sup>2</sup> |

# Steady

## Rigid Just Click

**TFD**  
ON THE FLOOR®

The Steady is part of the Just Click collection. This floor with a robust concrete appearance gives a solid foundation to your interior. The characteristic structure of the Steady creates a powerful interior image. This LVT floor matches the raw atmosphere that is reflected in interiors such as an industrial living style. When the Steady is combined with roughened metal, steel and leather, this floor comes into its own.

Size A: 115 x 610 mm

| Steady A  |                     |

# Living

## Rigid Just Click

The Living is part of the Just Click collection. This floor fits well in a light living environment. Where enjoying the moment and the sense of freedom is an art of living. The airy appearance of the Living creates a homely atmosphere. This LVT floor is very suitable for lavish living styles and thanks to its neutral color scheme, ensures coherence in the room. It can be effortlessly combined with colorful and soft materials, giving your interior an optimistic, warm and radiant character. In addition, the length effect of the extra long planks (1.79m) increases the optical perception of the room.

# Hungarian Point

The zigzag pattern of the Hungarian Point, brings visual dynamics in the optical experience. In origin it was a classic installing pattern for many wooden floors, now it's back in the interior as an actual modern design in LVT flooring, which fits very well in a sleek interior. In comparison to the installation method of the herringbone, the Hungarian point creates a much calmer look. Our Hungarian point, as flooring, makes impact and assures style.

# Woven L+

With this floor design is interwoven with technology. The Woven is made of woven PVC yarns. Due to the very strong fiber and the fine weave, the floor is very suitable for intensive use and durable in terms of lifespan. The EPT™ top layer treatment provides antibacterial protection. The surface of the floor feels soft and sound-damping, easy to clean and protected against discoloration. In addition, the reliable EPT™ core structure contributes to the stability of the Woven. No glue is required for installation due to the Quick and Easy ECOLAY® system.

A formulation without phthalates is used as plasticizers for the production of this floor. Instead, we have opted for alternatives that have not been found to be harmful to human health and the environment

TFD  
ON THE FLOOR®

# Innovative Register

MAG-RE-15-1

MAG-RE-15-3

TFD is always looking for new innovations. That is why we are one of the first who brings a new product to the market. An important innovation is a **magnetic floor**. It is a practical method for laying loose TFD in a room. A magnetic foil is rolled out onto a flat floor. The magnetic designed tiles/planks are placed on top. The floor is very stable and is easy to move.

# Roll glue

## TFD Roll glue

- Non-flammable
- Solvent-free
- Easy and safe to apply
- Favourable spreading capacity
- No grin through of adhesive trowel marks
- High final bond strength

For the installation of TFD LVT panels and -tiles on smooth subfloors. TDF adhesive is suitable for any type of subfloor that has good tensile and compression strength.

## LVT FIX 1.8

Our underlayment, the LVT Fix 1.8, is an 1.8 mm thick product which forms a steady base for installing your LVT flooring. The foil has an self-adhesive upside on which the LVT flooring can be installed directly. It also provides a level surface, until 0.3 mm imperfections, so there will be no need to use other levelling products to create a smooth and flat surface before installing LVT. This foil makes it possible to install LVT flooring within a day's work. It also has a sound reduction of 15 dB, due to this sound reduction it's very suitable for apartment's which demand a minimum sound reduction. Next to the easy way of installing and the high level of sound reduction, the foil is also suitable for floor heating and -cooling, has an excellent thermal resistance and dynamic load.

## Cleaning

### TFD Cleaner

A LVT floor from TFD is easy to maintain. Regular vacuuming and mopping with TFD Cleaner keeps your floor as new. So no expensive semi-annual polish operation is required! Your floor is just beautiful. Without extra work.

# USP's of a TFD floor

## Sustainable and recyclable

TFD floors consist of so-called Virgin PVC's. It means that they are the first quality PVC's, pure and not polluted by lesser qualities. Our LVT floors can be recycled for 100% and can be used to produce a different product. That's how we think about the future!

## Anti-allergy

The comfortable TFD floors are moisture and dirt resistant and have an extra durable PU top layer. For people (and animals) with an allergy it is of great importance that the floor is clean. Dust mites and dirt cannot accumulate due to the closed surface of the LVT floor. This prevents the provocation of allergic reactions. Another advantage of the TFD LVT floor is that due to the bacteriostatic property of LVT, the bacteria on the floor do not multiply.

## Suitable for underfloor heating & cooling

The LVT floors from TFD are particularly suitable for use with underfloor heating. And possibly in combination with the right subfloor you make efficient use of this heat. The guideline for LVT is that the temperature on the underside of the floor must not exceed 27°C. Another advantage of the TFD LVT floor is that the reverse also works. The floor is also ideal for floor cooling in the summer. So you always have a pleasant warmth or coolness at home.

## Moisture resistance and maintenance

All TFD LVT floors are water resistant and therefore very suitable for use in damp rooms such as the kitchen or the bathroom. The LVT floors from TFD are easy to maintain. Even when you have pets. Regular vacuuming is the most important thing. If necessary, you can then mop the floor with a PH-neutral cleaner without soap residue. We recommend our own TFD Cleaner, which has been specially developed for our LVT floors.

## Shock-proof and sound-absorbing

The LVT floors from TFD are suitable for frequent and demanding use. They are resistant to high point and pressure loads. Thanks to the hard wear-resistant layer, ladies can walk across the floor with high heels. And when you want to move the furniture, you do not have to worry about unsightly pressure points. However, it is important that good felt caps are attached under the legs as protection. A LVT floor from TFD provides minimum sound transfer and meets the international noise standards. You can quietly read a book when the children play in the adjoining room or watch TV.

The image shows a modern interior design showroom with a high ceiling, exposed concrete beams, and large circular pendant lights. The floor is made of large, light-colored wooden planks. In the center, there are large digital displays showing various interior design scenes. To the right, a large green plant is visible. The overall atmosphere is bright and contemporary.

# Welcome in our Experience Center

Get inspired by the floors of TFD! Your dealer is ready to make an appointment in our completely renewed TFD Experience Center in Dalfsen, it's allways at your disposal. You're welcome.
