TRUE MASTERS OF THE CRAFT

Where passion, craftsmanship, and creativity come together

In 1991, Rob and Monique were determined to build their company. While Monique handled all the necessary paperwork to allow Rob to start his dream of an independent flooring installation business, Rob traveled the world to perfect his craft. He developed into a true master of his trade, driven by the belief that nothing is impossible. With that mindset, they have successfully completed numerous challenging projects together, with Monique quickly becoming actively involved on the work floor as well.

A true family business

At TFD Floortile, it's about more than just floors. Our family business, founded by Rob and Monique and now joined by their daughters Daena and Ayla, stands for craftsmanship, dedication, and a warm atmosphere. We provide high-quality PVC floors and make everyone part of the TFD family, which sets us apart in our collaborations.

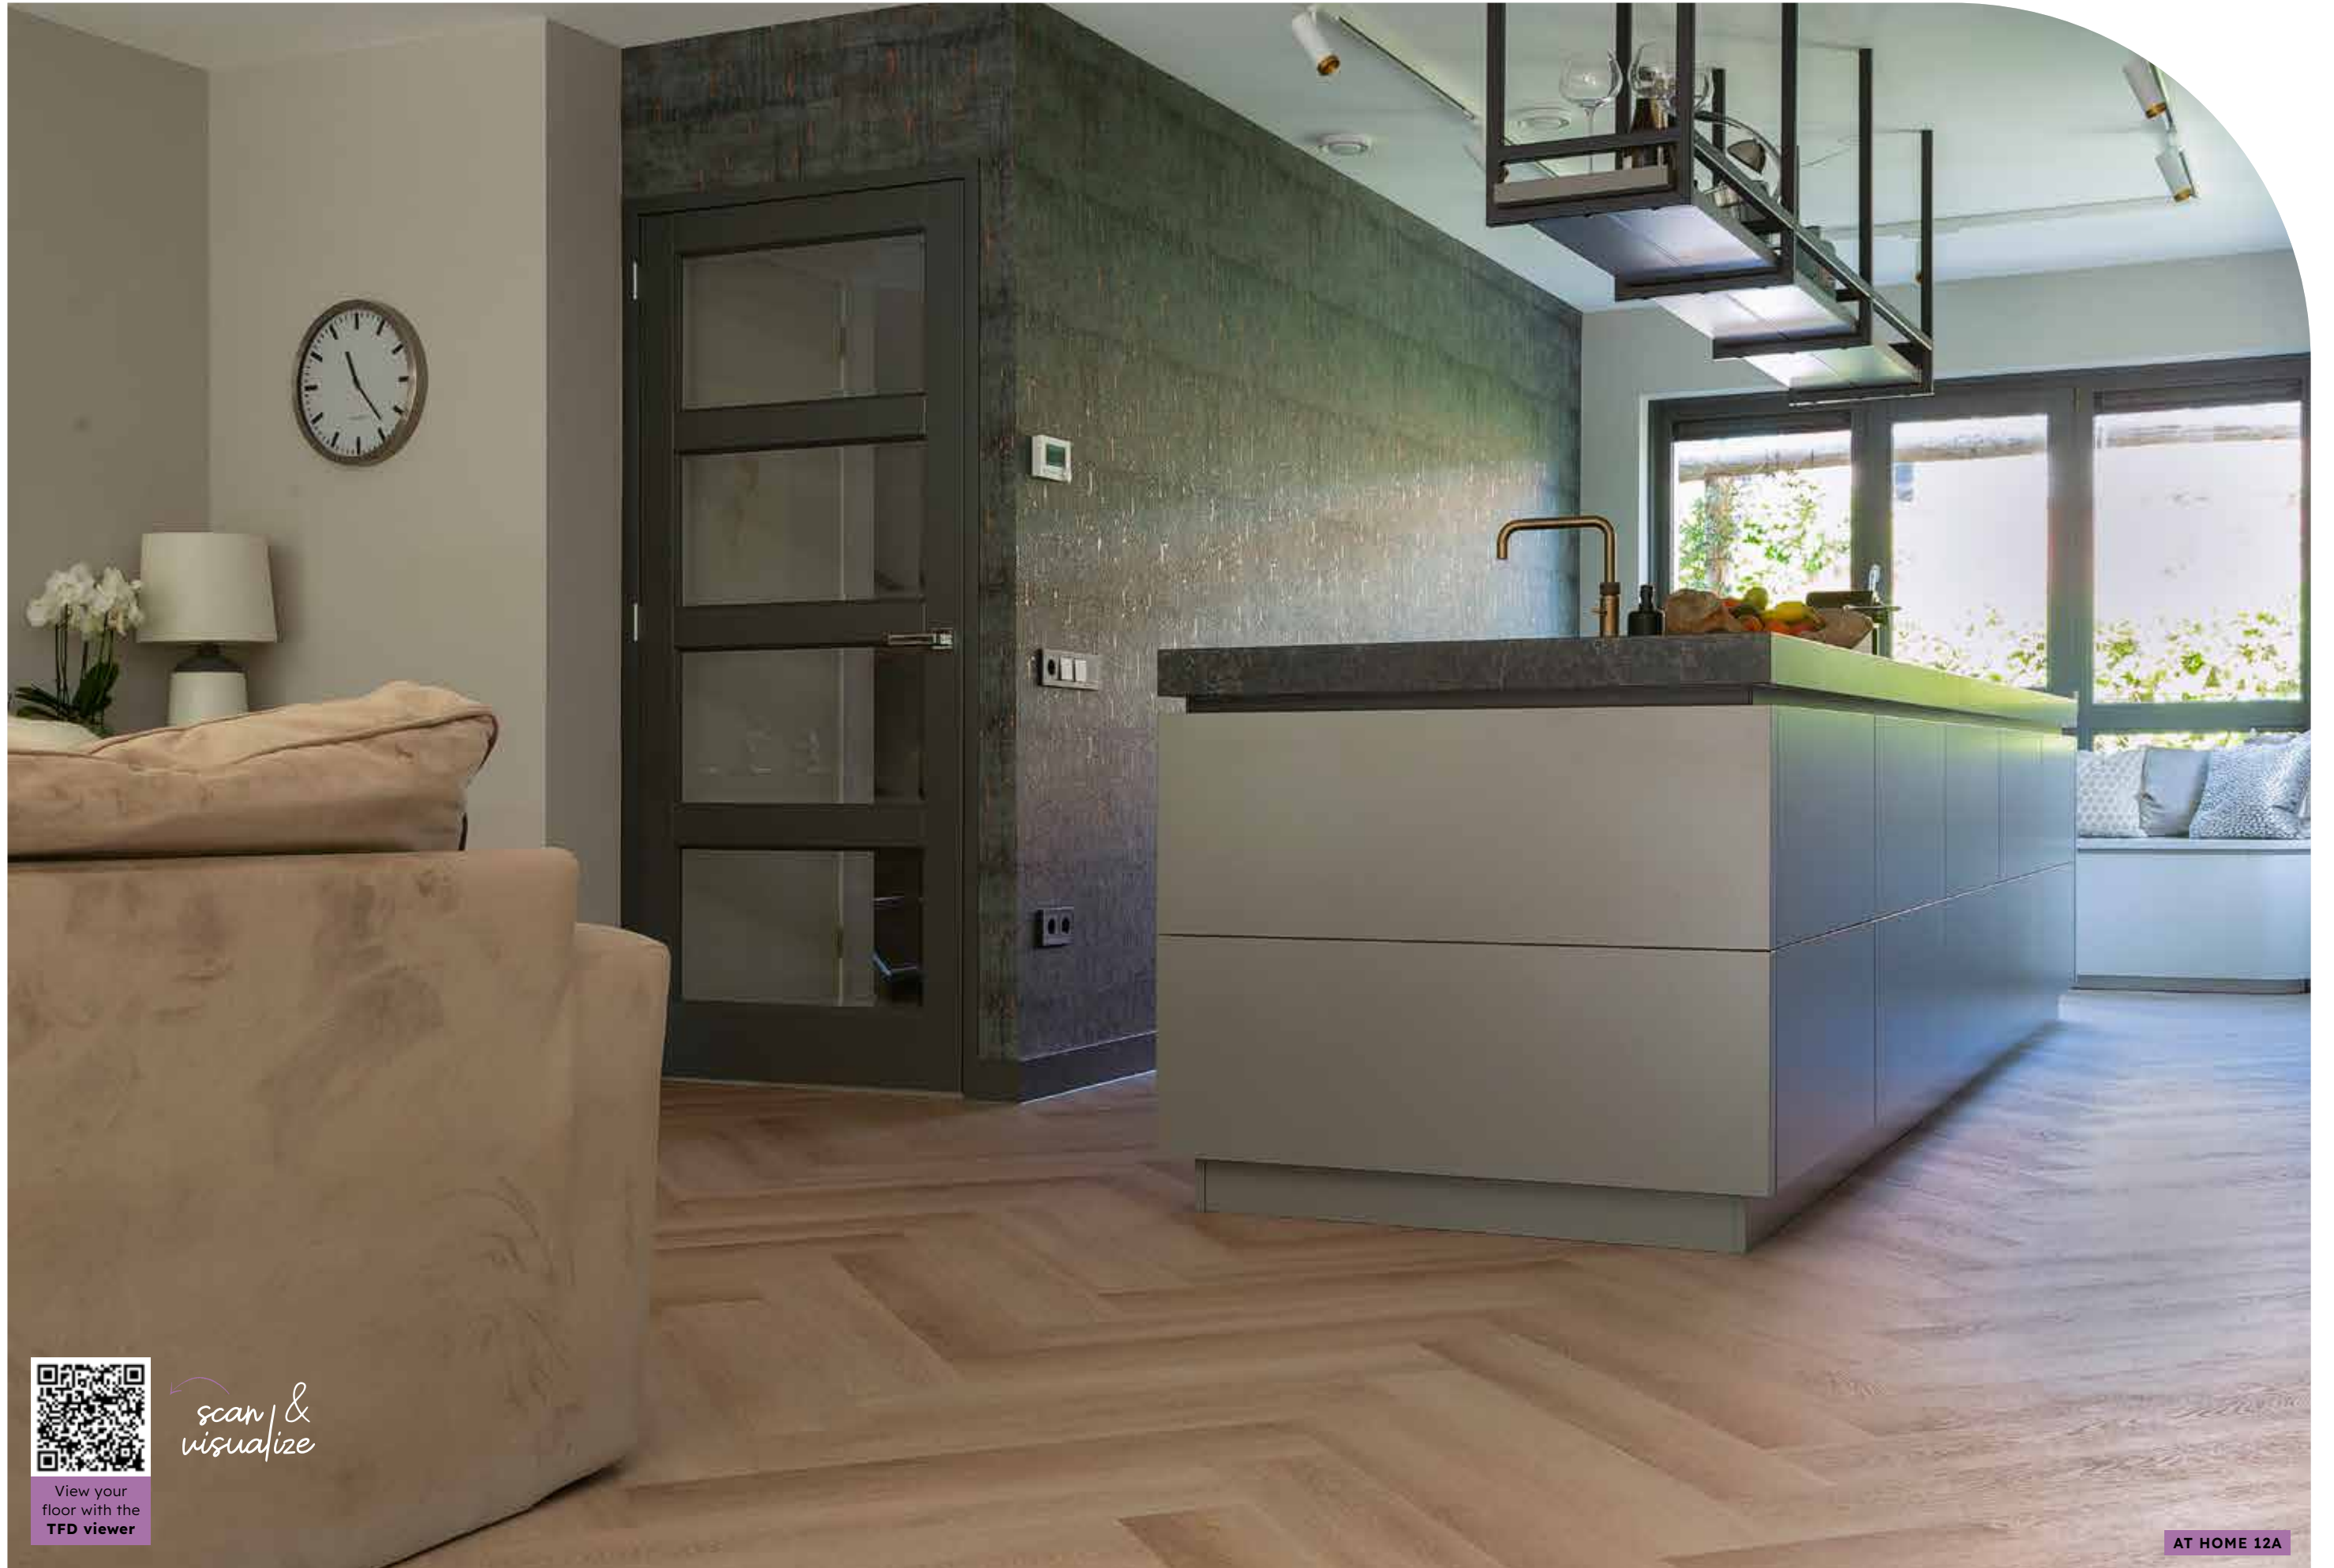

The family business TFD Floortile stands for craftsmanship, dedication, and a warm family atmosphere. Since its founding, TFD has been committed to delivering the most beautiful, top-quality PVC floors. What truly makes TFD special, however, is the way we work together. At TFD, you're not just an employee — you're part of the TFD family.

As a flooring installer, you know what truly matters when choosing and laying a floor. Knowledge of subfloors, materials, and finishing is crucial — especially with PVC.

That's where TFD makes the difference. Our floors are not only stylish but also technically robust: durable, low-maintenance, and comfortable. This expertise allows us to provide advice that goes beyond the showroom.

Our collection fits seamlessly with this approach. Thanks to the expertise of installers and retailers, the qualities of our floors are fully utilized.

In short: we don't just sell a floor; we offer a complete solution. That is the power of quality, craftsmanship, and expert advice.

AT HOME 12A

Unlimited possibilities

Thanks to the wide range of applications and extensive selection of designs, our PVC floors offer something for everyone.

The TFD PVC floor collection features realistic decors with registered embossing (EIR), where the texture of the plank matches the print. Innovative techniques create a visible and tactile grain, giving the floors extra character. The collection includes textures such as wood, stone, concrete, and marble in a variety of colors.

TFD floors are:

- ◆ Easy to maintain
- ◆ Cost-effective
- ◆ Moisture- and stain-resistant
- ◆ Sound-reducing
- ◆ Hypoallergenic
- ◆ Suitable for underfloor heating and cooling
- ◆ Environmentally friendly

In our brochure, we strive to represent the collections as accurately as possible, but colors may vary. Want to see them in person? Make an appointment at our Experience Center in Dalfsen or request color samples.

THE PRODUCTS OF TFD

View the complete collection online

Realistic, durable, and perfectly suited for a variety of applications

Sustainable and future-oriented

We strive for sustainability, clean production, and good working conditions for our employees.

TFD floors are made exclusively from so-called “virgin PVC.” These are pure, first-quality PVCs that are not contaminated by lower-grade materials. Our PVC floors can be 100% recycled. This is how we envision the future: caring for the environment and the well-being of our customers.

STYLE 1617-9

A stable foundation for every interior

Dryback PVC floors are glued directly onto a leveled subfloor, so the surface must be perfectly smooth and stable.

These floors are thin, flexible, and feature a matte protective layer. They are low-maintenance and easy to clean (see page 82). Thanks to their slim construction, they allow underfloor heating and cooling to work optimally and improve acoustics, as PVC absorbs sound much better than laminate or wood. In addition, they can be used effortlessly in damp areas.

THE EASY COLLECTION

Uncomplicated enjoyment

Light in character

This PVC floor collection is light in character. The Easy collection reflects uncomplicated enjoyment. Thanks to its refined texture, this floor is suitable for a variety of interior styles.

The Easy effortlessly connects the different elements of your interior. It adapts easily to its surroundings, giving your space a soft, inviting, and friendly appearance. In addition, like all our PVC floors, the Easy is very user-friendly and easy to maintain.

The Easy collection is also available as Rigid Just Click, shown on pages 73 and 74.

AT HOME 12A

The best of both worlds

Rigid Just Click floors are strong, durable planks made from SPC (Stone Plastic Composite) — a blend of stone and plastic. This material is extremely stable, moisture-resistant, and ideal for heavy use. The floors are installed as a floating system and do not require glue.

Often, leveling is not necessary, and Rigid Just Click floors can be installed directly over an existing hard floor, as long as the subfloor has no significant height differences (more than 2 mm). This makes installation quick and easy.

The durable Rigid Just Click PVC floor is ideal for both residential and project markets. It combines the convenience of PVC with the fast click system. With a thickness of 5 mm and a wear layer of 0.55 mm or 0.3 mm, the floor is both strong and realistic, thanks to the embossing.

Rigid floors are available in:

In our brochure, we aim to represent the collections as accurately as possible, but colors may vary. Want to see them in person? Make an appointment at our Experience Center in Dalfsen or request color samples.
