## WARRANTY STATEMENT WOVEN L+

TFD Floortile BV (henceforth TFD) herewith guarantees, when limitations and conditions mentioned here are met, the good quality of its woven L+ products, with the exception of slight variations in colour, which are technically inevitable, and hidden flaws which do not noticeably lessen the practical value. Should after delivery a situation of uncommon and extraordinary wear of the Woven L+ flooring occur within the period of warranty (see schedule below), TFD will repair or replace that particular part that is subject to uncommon wear.

A 10% reduction on the original price of the material will be deducted from the 1st year (depending on the quality and application) for each year, or part of the year, that has elapsed since delivery. TFD keeps the reservation of a slight difference in colour in the repaired or replaced part.

Period of Warranty:

<b>Product</b>	<b>Thickness</b>	<b>Professional</b>	<b>Private</b>
Woven L+	3mm	7 years	10 years

Complaints concerning shrinkage will only be accepted if the shrinking is more than normal, as described in EN 434 and EN 649.

To the obligations mentioned above we connect the following conditions:

- Professional replacing of the flooring according to our installation prescription.
- A proper choice of flooring considering the circumstances.
- Installation of the Woven L+ on a suitable sub floor, processed according to the installation prescriptions of the glue producer.
- Professional maintenance and cleaning of the Woven L+ floors, according to our Maintenance & Cleaning Guide.
- No exceeding the limit of dynamic load of 50 kg/cm<sup>2</sup>
- Use of desk chairs with seamless wheels of soft plastic of at least 50mm and a tread width of at least 20mm in diameter. All this according to DIN 68131 and/or EN 425
- TDF has permission to inspect the level flooring, its maintenance and condition of cleaning, during office hours, if they deem it necessary.

Every claim referring to this guarantee will be dismissed by TFD if damage to the level flooring is caused by burning, scorching, or exposure to excessive heat, or as a result of contact with chemicals, like e.g. detergents that are not advised to use. TFD accepts no liability for the level flooring supplied other than its responsibility that results from this guarantee. TFD is not liable for any financial damage that exceeds the value of the flooring material.
